Ever wonder about the history of sex in America? This documentary series explores the. (1997) Academy Award for Documentary Short Subject Best Documentary. In 1851, the birth of sex.Conventionally, a self-driving vehicle in which a self-driving unit detects an obstacle while moving along a road is known. The self-driving unit is provided with an imaging device such as a two-dimensional camera, a three-dimensional camera, an infrared camera, and a radar device. The self-driving unit detects an object on the road using information of an image or a radar signal obtained by the imaging device or the radar device. If the self-driving unit detects the object, the self-driving unit generates driving information associated with the object. If the self-driving unit is provided with the radar device, the driving information associated with the object is, for example, a distance between the self-driving unit and the object, an angle of a vertical line passing through a center of the self-driving unit, which is oriented downward, to the object, or a lateral acceleration which is obtained by integrating a yaw rate of the self-driving unit. If the self-driving unit is provided with the radar device, the self-driving unit measures a distance from the object using the radar device. Specifically, the self-driving unit transmits a pulse to the object, which is in a radar detection area, and then measures a distance from the object using a reflected wave of the pulse. For this purpose, the self-driving unit scans the radar detection area. If the self-driving unit detects the object, the self-driving unit outputs driving information associated with c6a93da74d
