Mastering CMake Sixth Edition, Ken Bill Martin and Hoffman With contributions from: Medulloblastoma of the pineal region: a case report. Medulloblastoma is the most common malignant brain tumor of childhood. We present a case of medulloblastoma in a 2 1/2-year-old boy who presented with acute-onset severe headache, nausea, and vomiting. Computed tomography demonstrated a heterogeneous mass with cysts, in the pineal region. The mass was surgically resected, and pathologic examination revealed classic medulloblastoma. Posted by Kamal Hylton, January 24, 2015 “[BTS] is more than a fandom, more than something that we are doing for a little bit of fun — it’s more about standing up for things.” Since the birth of Big Bang and Big Hit, K-pop has been

growing rapidly in both popularity and recognition throughout the world. The K-pop industry has been shifting its focus from the mainstream scene to one that is more approachable by Western audiences. The industry also has a history of creating ambitious male groups that can pull off a variety of songs, as well as performing them in a completely flawless manner. Among those pioneers is BTS, who have consistently been setting new goals for the industry while also being a great role model for young performers, as well as a powerhouse for showcasing positive messages. Their popularity has grown to such an extent that they received the Annie Award for Best International Album for their hit album Love Yourself: Answer and released music videos for all of their singles. Their most recent achievement was placing second at the 2016 Billboard Music Awards. In conversation with Billboard, BTS spoke about how they use their position as one of the most prominent artists in the K-pop scene to further progress the industry, as well as the positive
