SystemesLiving Man's best friend, the dog, is the fastest growing pet in America, according to the American Pet Products Association. This means more dog food for you! In a recent survey by Zignature, a digital signature service, we found that 65% of dog owners expect to spend more on their pets in the next year, compared to just 21% of

pet owners who expect to spend less. Most of us have at some point had a pet in our lives, but what's often overlooked is that the average dog's life is 12-15 years, while our life expectancy is almost 80. So, when choosing a dog and bringing it home for the first time, you should ask yourself: "What will I do with this dog for the next 15 years?" The answer to that question will determine how

much you will spend to feed it, and how much you will spend on its health care and preventive care. With a busy family and work commitments, how do you find time to be active? A simple 30 minute brisk walk will do wonders for your health and clear your mind. Every day our kids face new

It has three sections: (1) your frequently used commands, (2) the document and (3) the

input window. You can easily create and rearrange customizations to fit your specific needs. (video: 1:05 min.) When you make a selection in a drawing, right-click to open the contextual menu for that section and choose a command. You can also assign a keyboard shortcut to a command. In AutoCAD, you can configure up to eight hotkeys, which can be used to access frequently

used commands and functions. (video: 1:26 min.)

## Ribbon and Quick Access Toolbar: Build a model with code, and then dive into the details at any time. Choose a tool from the Quick Access Toolbar or the Ribbon.
