Disk Usage Viewer Description: Get detailed information about the content of the disk and the properties of each file, folder and disk area. The application allows you to gain deep and detailed information about the content of a disk drive, including the total amount of storage space used, the number of files in each directory, and the size of files, directories, and files and folders. The software uses the most advanced file system technologies to provide users with accurate information that you can use to make an informed decision. With Disk Usage Viewer, you can quickly and easily identify those files, directories, and folders that occupy more space than the others and find out what is the exact content of each file. This utility will allow you to get detailed information about your disk and disk drives, using the most advanced file system technologies. It allows you to easily identify those files, directories, and folders that occupy more space than the others. With Disk Usage Viewer you will be able to easily identify which of those files and folders are system files, which are used by the OS, and which are media files. Detailed information about the content of your disk drive will be displayed. It includes the total amount of storage space used, the number of files in each directory, the size of files, directories, and files and folders. With this software you will be able to see detailed information about the content of your disk drive. In order to see the size of each file, a directory or the total amount of space available in the disk, just select the corresponding icon and read the file, directory or disk space details. This feature is available in the "Files" category. Disks with different file systems are supported. You can see the detailed information for each file on the disk. Additionally, this utility will show you detailed information about the files on the disk drive, such as their size, the date and time they were last
