What's New In SkypeSedator?

SkypeSedator is a simple and useful application that can automatically close the Skype Home Popup Window. The software keeps itself in the Skype process to continually check and close the popup, whenever this appears. The following table presents the features of SkypeSedator and its modules. Features SkypeSedator SkypeSedator Module: SkypeHomePopup SkypeOptions SkypeLogs SkypeDotCom Description If you want to always have the Skype Home Popup Window closed automatically, then SkypeSedator is for you. It will automatically close the Skype Home Popup Window, every time it appears. The SkypeSedator application is based on a simple module, SkypeHomePopup, which can be used alone to close the Skype Home Popup Window automatically. When SkypeSedator is not running, the SkypeHomePopup module is only used to start the application when the Skype Home Popup Window appears. The SkypeSedator program is written in C++. SkypeSedator Version History SkypeSedator v1.3.3 - Bugs fixed SkypeSedator v1.3.2 - The Skype log file are now closed when the application closes or terminates SkypeSedator v1.3.1 - Fixed start of the application SkypeSedator v1.3 - Add a module, SkypeLogs, to control the Skype log file - The SkypeLogs module can control the log file, created by the SkypeSedator program. SkypeSedator v1.2 - Add a module, SkypeOptions, which can control the Skype options (Skype Home Popup Window, etc.). SkypeSedator v1.1 - The option dialog has been removed, so the software can be used without option dialog. SkypeSedator v1.0 - The program was created for version Skype 4.3 and 4.4. - The software can not be used, by people who have Skype 4.3 or 4.4. Note: SkypeSedator is very simple and does not add any features, but for Skype v4.3 and v4.4 Skype Home Popup Window will not close by itself. Installing SkypeSedator Download the.exe file of the SkypeSedator program. Double-click on the downloaded program's executable file, or open the program's exe file with a Windows Explorer. If you want to install the module, SkypeHomePopup, on your computer, just double-click on the program's executable
