What's New in the iSpring Flip?

iSpring Flip is an innovative e-Learning software that helps you to create interactive e-Learning courses. This product allows you to easily create e-Learning course that can be accessed on smartphones, tablets, and computers. With iSpring Flip, you can create interactive educational content that is compatible with the latest e-Learning standards, which you can then share with others or upload to the learning management system (LMS) of your choice. Features: Creating e-Learning content is a challenge in itself, especially when you have to work with data that is different from that of conventional Office documents. Here, iSpring Flip comes to the rescue, as it makes the work with these documents an easy and effective process. Text-based e-Learning, HTML5 and multimedia content iSpring Flip allows you to build your course in simple and quick steps. You can start creating your e-Learning course by choosing the source from which you want to generate the content. Choose between PDF, MS Word or MS Powerpoint documents. The iSpring Flip product can generate HTML5 content that can be viewed in a browser, uploaded to an FTP server or sent via email directly from within the application. The application automatically optimizes the output for desktop computers, tablets, and smartphones, allowing you to preview the result before publishing it. Alternatively, you can choose to build a learning course and upload it to a LMS platform (SCORM 1.2 or 2004, AICC, Blackboard 9.x, Experience API, cmi5). In this case, you can customize the lesson name, add it keywords and attach it a short description. Furthermore, statistical data regarding your students and their progress with the current lesson is

included in the LMS reports. Mobile Learning and support for multiple LMS platforms iSpring Flip can generate HTML5 content that can be viewed in a browser, uploaded to an FTP server or sent via email directly from within the application. The application automatically optimizes the output for desktop computers, tablets, and smartphones, allowing you to preview the result before publishing it. Furthermore, mobile learning and support for multiple LMS platforms is built in to the product, making it possible for you to use any current LMS platform you prefer. Generate HTML5 and e-learning courses without effort iSpring Flip allows you to build your course in simple and quick steps. You can start creating your e-Learning course by choosing the source from which you want to generate the content. Choose between PDF, MS Word or MS Powerpoint documents. The iSpring Flip product can generate HTML5 content that can be viewed in a browser, uploaded to an FTP server or sent via email directly from within the application.
