Syrian.exe application which is used for the English patch has a IDP trojan attached to it. AVG keeps on removing it from my computer. I am unable to play without it. To play I have to completely disable my antivirus. Because as soon as I enable it and start the game, it is removed and I have to download again for that single file. This is used with the ISO route. The MDS route does the same thing but with different files. Please fix this! I ended up downloading Sharin no Kuni, Yuukyuu no Shounenshoujo INSTEAD OF Sharin no Kuni, Himawari no Shoujo which this is. I used a torrent to download and so ended up screwing things up by misinterpreting it >_ I am extracting the files all to the same place but 7zip is giving me a message saying most of them are broken. Also the game runs but its pretty obviously broken due to some of the files being missing. Am i doing something wrong? Or are the files i downloaded just incomplete? HELP PLEASE !!!! i downloaded all of the files in media fire then extracted it then i open the kira kira icon with the guitar on it and an error comes out that says (some japanese characters) and in the middle [system.arc.ipl._bp] I downloaded the game, except for part 6, which I tried to download six or seven time at different time and places, but always stop at 50mb downloaded or less, like the download was finished. I got lucky and got 119 once, and I extracted it. The game is working, I have no voice, but no error otherwise, so I was wondering if it was just me. After downloading and extracting all of the above downloads then whats next??

1) Do i merge them inside one file/folder altogether?

2) Or make one MAIN folder and stack all folder in it? (7 parts = 7 folder in that MAIN folder?) Ai part 2 doesnt load from file sonic but just use file serve, its horribly slow, funny enough i can download part 1,3,4 and 5 from filesonic in the time it takes to get part 2 from file serve (i could get pt 6 if not for all wait between downloads) but ye just set up pt2 from file serve and do the rest as you wait (for future refferance and others users anyways ^^) well hi!! thank you for posting the links!!! i really appreciate it!!! but i am new on downloading this kinds of stuff so can someone please tell me what to do step-by-step??? please i really want to play this game thank you for your time and understanding
