What is *La Zona Gris* about? *La Zona Gris* is a book that combines sociology, anthropology, and political science to examine the phenomenon of looting in Argentina. Auyero argues that looting is not a spontaneous or irrational act of desperation, but rather a complex and organized form of collective action that involves multiple actors and interests. He shows how looting is influenced by the political and economic context, the social networks and identities of the participants, the role of the media and public opinion, and the strategies and tactics of the police and the state. *La Zona Gris* is based on extensive fieldwork that Auyero conducted in two poor neighborhoods of Buenos Aires, where he interviewed looters, witnesses, victims, activists, politicians, police officers, journalists, and experts. He also analyzed official documents, media reports, and academic literature on the topic. He uses a variety of methods and sources to reconstruct the events and narratives of the looting, as well as to explore the meanings and consequences of this form of violence. *La Zona Gris* is not only a book about looting, but also a book about power, domination, resistance, and survival in contemporary Argentina. It reveals how the poor and marginalized sectors of society cope with the hardships and uncertainties of their lives, how they negotiate their relationships with the state and other actors, and how they express their
