

## How to Activate SPEEDbit Video Accelerator Premium with Serial Number

SPEEDbit Video Accelerator is a software that improves your web video viewing experience by reducing buffering and freezing problems. It supports over 165 video sites, including YouTube, and can accelerate normal, high quality, high definition and iTunes videos. If you have purchased a subscription for SPEEDbit Video Accelerator Premium, you will need to activate it with a serial number that you received via email. Here are the steps to do so:

1. Download and install SPEEDbit Video Accelerator from <http://www.videoaccelerator.com/download/>
2. Right-click the SPEEDbit Video Accelerator tray icon located in the system tray, and then click Enter Activation Code.
3. Select the I already have a premium version activation code option, and then type your email and the code in the provided fields.
4. Click Activate Now and enjoy the premium features of SPEEDbit Video Accelerator.

If you have any questions or need technical support, you can visit <http://www.videoaccelerator.com/help/> or <http://www.videoaccelerator.com/faq/> for more information. SPEEDbit Video Accelerator Premium offers several advantages over the free version. It can accelerate HD videos with bit rates above 200 Kbps, which are usually the highest quality videos available on the web. It can also accelerate iTunes downloads of music, music videos, movies and TV shows, making them faster and smoother. Additionally, it can accelerate videos from more sites than the free version, including Facebook, Vimeo, Dailymotion and more. Another feature of SPEEDbit Video Accelerator Premium is the Real Time Video Tweeting. This allows you to share your favorite videos with your Twitter followers as you watch them. You can customize the tweet text and add hashtags or mentions to make it more engaging. You can also enable or disable this feature from the settings window of SPEEDbit Video Accelerator. SPEEDbit Video Accelerator is compatible with most web browsers, such as Internet Explorer, Firefox, Chrome, Safari and Opera. It works seamlessly with your browser and does not require any configuration or changes. You can also check for updates from the tray icon menu or the settings window to make sure you have the latest version of SPEEDbit Video Accelerator. If you want to learn more about how SPEEDbit Video Accelerator works, you can visit the help page or the FAQ page on the website. You can also watch some videos that demonstrate the benefits of SPEEDbit Video Accelerator on YouTube. You can find the links to these resources on the main screen of SPEEDbit Video Accelerator. SPEEDbit Video Accelerator is a safe and secure software that does not contain any spyware, adware or viruses. It respects your privacy and does not collect any personal information from your computer. It also does not interfere with your internet connection or bandwidth. You can trust SPEEDbit Video Accelerator to deliver the best video experience possible. If you are not satisfied with SPEEDbit Video Accelerator for any reason, you can uninstall it easily from your computer. Just go to the Control Panel and select Add or Remove Programs. Find SPEEDbit Video Accelerator in the list and click Remove. Follow the instructions to complete the uninstallation process.
