Tips and tricks for Bleach vs Naruto

If you want to improve your skills and enjoy the game more, here are some tips and tricks that you should know:

How to transform

Some characters have the ability to transform into more powerful forms during the battle. To do this, you need to fill up your mana bar by attacking or getting hit. Once your mana bar is full, you can press L (for player 1) or Num 1 (for player 2) to activate your

transformation. Some characters have more than one transformation level, which require more mana bars to activate. For example, Ichigo can transform into his Hollow form with one mana bar, or his Final Getsuga Tensho form with two mana bars.

How to block and dodge

Blocking and dodging are essential skills for avoiding damage and countering attacks. To block an attack, you need to press K (for player 1) or Num 2 (for player 2) right before the attack hits you. This will reduce the damage you take by half, but it will also drain your mana bar slightly. To dodge an attack, you need to press J (for player 1) or Num 4 (for player 2) right after the attack hits you. This will make you invincible for a brief moment, but it will also consume some of your stamina bar. You can also double tap the arrow keys (for player 1) or the Num 8, 5, 4, and 6 keys (for player 2) to dash in any direction, which can help you evade or close the distance with your opponent.

How to use skills and specials

Skills and specials are powerful moves that can deal a lot of damage or have other effects. To use a skill, you need to press U (for player 1) or Num 4 (for player 2), and to use a special, you need to press I (for player 1) or Num 5 (for player 2). However, you can only use skills and specials when your mana bar is at least half full. You can also combine skills and specials with other keys to perform different variations. For example, Naruto can use his Rasengan skill by pressing U, or his Rasenshuriken skill by pressing U + down arrow. He can also use his Tailed Beast Bomb special by pressing I, or his Six Paths: Ultra-Big Ball Rasenshuriken special by pressing I + down arrow.
