What is cadwork v19 12 and why you should use it for your wood construction projects

cadwork v19 12 is the latest version of the leading 3D-CAD/CAM software for all fields of timber construction. It offers a complete solution from drafting to manufacturing, with a variety of specialized modules that cater to different needs and preferences. Whether you are working on timber frames, prefabricated panels, modular homes, log constructions, solid wood walls, SIPs, glulam or any hybrid combination, cadwork v19 12 can help you design and produce them with ease and efficiency.

The benefits of cadwork v19 12

cadwork v19 12 has many features and advantages that make it a powerful and versatile tool for wood construction professionals. Here are some of them:

- It is based on AutoCAD and BricsCAD platforms, which means you can enjoy the familiar interface and commands, as well as the compatibility with other CAD software and formats.
- It has a global modeling solution that covers each stage of a project, from designing to site management through to coding and production. You can create 2D layouts and details, 3D models, BIM data, IFC files, CNC files, material lists, shop drawings and more.
- It has a user-friendly environment that allows you to work with parametric components, automatic routing options, smart snapping and alignment tools, dynamic editing and modification functions, customizable libraries and catalogs, and many more.
- It has a high-performance rendering engine that enables you to visualize your projects in realistic and interactive 3D views. You can also export your models to VR devices for immersive presentations and simulations.
- It has a seamless integration with other software solutions such as CAESAR II for pipe stress analysis, PV Elite for pressure vessel design, Leica for measuring tools, Pointcloud for laser scanning data, and more.
- It has a flexible licensing system that allows you to choose the modules and options that suit your needs and budget. You can also benefit from the educational license for students and teachers.

How to get started with cadwork v19 12

If you are interested in trying out cadwork v19 12 for your wood construction projects, you can download a free trial version from their website <https://www.cadwork.com/>. You can also request a demo or a quote from their sales team. You can also find more information about the software features, modules, prices, training, support and news on their website.

cadwork v19 12 is a comprehensive and innovative software solution that can help you take your wood construction projects to the next level. It is designed to meet the needs of all types of construction (wood, membrane, concrete, metal...), using pioneering technology to ensure maximum speed at viewing and access to data. With cadwork v19 12, you have all the required tools to develop your business and will never be deadlocked.
