

Flash V6 Xcruiser 400hd |TOP|

How to Flash V6 Xcruiser 400hd and Enjoy the Latest Features

If you are looking for a way to upgrade your Xcruiser 400hd receiver and enjoy the latest features, you might want to flash it with the Flash V6 firmware. Flashing your receiver means installing a new software on it, which can improve its performance, stability, and functionality. In this article, we will show you how to flash V6 Xcruiser 400hd and what benefits you can get from it.

What is Xcruiser 400hd?

Xcruiser 400hd is a digital satellite receiver (set-top box) that allows you to watch TV channels from different satellites. It is one of the products of Xcruiser, a company that has been serving consumers and industrial users since 2003. Xcruiser has been producing devices with the latest technology, from analog to digital, MPEG-2 to Ultra High Definition (UHD). Xcruiser 400hd is one of their FTA (free-to-air) series, which means it can receive unencrypted channels without a subscription.

What is Flash V6?

Flash V6 is a firmware update for Xcruiser 400hd that was released in December 2018. Firmware is the software that controls the hardware of your receiver. Updating your firmware can fix bugs, enhance security, add new features, and improve user experience. Flash V6 is the latest firmware for Xcruiser 400hd that offers many improvements and additions, such as:

- Support for USB-T2/C device, which enables the receiver to receive terrestrial or cable channels
- Support for programmable remote control, which allows you to copy other remote keys such as power key of TV or source key of home theatre
- Support for Android operating system of Nougat 7.0
- Support for digital video broadcasting (DVB) PC application
- Improved user interface and menu design
- Improved stability and performance

How to Flash V6 Xcruiser 400hd?

To flash V6 Xcruiser 400hd, you will need a USB flash drive, a computer, and an internet connection. Here are the steps to follow:

1. Download the Flash V6 firmware file from [this link](#). The file name is XCRUISER_XDSR400HD_PLUS_Flash V6.zip.
2. Extract the zip file on your computer. You will get a folder named Flash V6.
3. Copy the folder Flash V6 to the root directory of your USB flash drive. Do not rename or modify any files inside the folder.
4. Turn off your Xcruiser 400hd receiver and disconnect it from the power source.
5. Insert the USB flash drive into one of the USB ports on your receiver.
6. Reconnect your receiver to the power source and turn it on.
7. The receiver will automatically detect the firmware update on your USB flash drive and start flashing. Do not interrupt the process or turn off your receiver until it is finished.
8. When the flashing is done, your receiver will reboot automatically.
9. Remove the USB flash drive from your receiver.

10. Enjoy the new features and functions of your flashed Xcruiser 400hd!
