# How to Activate Genarts Sapphire 11 with a Serial Number

Genarts Sapphire is a collection of plugins that let you create stunning organic effects for video editing and compositing. If you have purchased a serial number for Sapphire 11, you will need to activate it on your license server using the following steps:

1. Download and run the GenArts RLM server software on the license server. You can find the download link here: <https://borisfx.com/downloads/?&product=RLM%20License%20Server>. Note that Sapphire requires RLM v11 or greater.
2. Open a web browser and go to: <http://SERVERNAME:5054/goforms/activate>. Replace `SERVERNAME` with the name of the license server.
3. Enter your serial number and click `Activate`.
4. Restart your host application and enjoy using Sapphire 11.

If you have any questions or issues with the activation process, please contact Boris FX support at [support@borisfx.com](mailto:support@borisfx.com).

Sapphire 11 is the latest version of the award-winning plugin suite from Boris FX. It offers over 270 effects and 3000+ presets that can enhance your video projects with stunning organic looks. Whether you need to add realistic lighting, create stylized transitions, or generate eye-catching particles, Sapphire 11 has you covered.

One of the key features of Sapphire 11 is the Effect and Transition Builder, which allows you to customize and combine any of the Sapphire effects in a simple drag-and-drop interface. You can also save and share your own presets with other users, or browse the online preset browser for more inspiration.

Another powerful feature of Sapphire 11 is the integration of Mocha, the Academy Award-winning planar tracking and masking tool. You can use Mocha to track and mask any Sapphire effect with ease, or export the tracking data to your host application for further editing. Mocha also supports 360/VR workflows, making Sapphire 11 an ideal solution for immersive video production.

Sapphire 11 is compatible with most of the popular video editing and compositing software, such as Adobe Premiere Pro, After Effects, Avid Media Composer, DaVinci Resolve, Nuke, and more. You can also use Sapphire 11 as a standalone application to render effects without a host.

If you want to try Sapphire 11 for yourself, you can download a free trial version from the Boris FX website: <https://borisfx.com/products/sapphire/>. The trial version is fully functional for 15 days and includes all the effects and presets.

To purchase Sapphire 11, you can choose from different licensing options depending on your needs. You can buy a perpetual license for a single host or a multi-host bundle, or you can opt for an annual subscription or a rental license. You can also upgrade from previous versions of Sapphire or other Boris FX products at a discounted price. For more information on pricing and licensing, please visit: <https://borisfx.com/store/>.
