How to Use TMPGEnc Video Mastering Works 5 to Play HD Videos Online

TMPGEnc Video Mastering Works 5 is a powerful video editing and encoding software that supports a wide range of input and output formats. It allows you to edit and combine your video clips faster than ever, then add transition effects, text, subtitles, and new filters to push it to the next level. You can also use it to convert your videos to different formats, such as H.264, MKV, FLV, and more.

One of the features of TMPGEnc Video Mastering Works 5 is the ability to create HD online player files. These are files that can be played on any web browser that supports HTML5 video. You can use them to share your HD videos online without losing quality or requiring additional plugins. Here are the steps to create HD online player files with TMPGEnc Video Mastering Works 5:

1. Launch TMPGEnc Video Mastering Works 5 and click on "Start New Project".
2. Click on "Add File" and select the video file you want to encode. You can also drag and drop the file into the Source stage window.
3. Click on "Format" and select "HD Online Player (H.264/AVC)" from the list of output formats.
4. Click on "Output" and choose a destination folder for your encoded file. You can also change the file name if you want.
5. Click on "Encode" and wait for the encoding process to finish.
6. Once the encoding is done, you will find two files in your destination folder: a .mp4 file and a .html file. The .mp4 file is the encoded video file, and the .html file is the web page that contains the HD online player.
7. To play your HD online player file, simply open the .html file with your web browser. You can also upload both files to your web server and share the link to the .html file with anyone who wants to watch your HD video online.

TMPGEnc Video Mastering Works 5 is a versatile and easy-to-use software that can help you create high-quality HD videos for online streaming. You can download a free trial version from their official website^[^3^] and try it out for yourself.

Here are some more paragraphs for the article:

TMPGEnc Video Mastering Works 5 also supports other output formats besides HD online player. You can choose from a variety of presets for different devices and platforms, such as PlayStation® Vita, iPad®, iPhone®, Blu-ray Disc, AVCHD, and more. You can also customize the encoding settings to suit your preferences and needs.

Another feature of TMPGEnc Video Mastering Works 5 is the timeline editing mode. This mode allows you to edit and combine your video clips in a graphical interface that resembles a professional video editing software. You can use the integrated clip transition effect tool to add smooth transitions between clips, the playback speed change filter to adjust the speed of your video, the vintage image filter to give your video a retro look, and more. You can also add text, subtitles, and audio tracks to your video project.

TMPEGEnc Video Mastering Works 5 is compatible with various video formats and codecs, such as AVCHD, DivX, FLV, H.264, MKV, MPEG-2 TS, and more. It can also import audio formats such as FLAC, Dolby Digital Plus, HE-AAC, and more. It can even capture video from HDV/DV camcorders and import Blu-ray or DVD-Video files by title. You can use the file reader selector function to choose the best file reader for your input file.
