

Skins Pioneer Cdj 2000 Djm 900 Nexus Virtual Dj _BEST_

How to Customize Your Virtual DJ with Skins Pioneer CDJ 2000 DJM 900 Nexus

If you are a fan of Pioneer CDJ 2000 and DJM 900 Nexus equipment, you might want to make your Virtual DJ software look like them. Fortunately, there are skins that can do just that. Skins are graphical interfaces that change the appearance and functionality of Virtual DJ. In this article, we will show you how to download and install skins pioneer cdj 2000 djm 900 nexus virtual dj.

Step 1: Download the skins

There are many websites that offer skins for Virtual DJ, but one of the most popular ones is VirtualDJ.com. Here you can find hundreds of skins for different devices and styles. To download skins pioneer cdj 2000 djm 900 nexus virtual dj, you can use the following links:

- [Skin Pioneer CDJ2000 NEXUS + DJM900 NEXUS](#): This skin mimics the design and features of the famous Pioneer CDJ2000 Nexus and DJM900 Nexus mixer. It has four decks, on-air function, hot cues, sync alarm, jogwheel rotation, kill buttons, limiters, and more. It also has three different views: with or without waveforms or with the browser on the whole page.
- [Virtual DJ Skin Pioneer CDJ200 \(EXCLUSIVE\)](#): This skin is a rare and exclusive collection that features the Pioneer CDJ200 design. It has two decks, pitch control, cue buttons, loop buttons, effects buttons, and more. It also has a sleek and minimalist look.

After you click on the links, you will be redirected to the download page. You will need to create an account or log in to VirtualDJ.com to download the skins. You can also browse other skins on the website and choose the ones that suit your preferences.

Step 2: Install the skins

Once you have downloaded the skins, you will need to unzip them and copy them to the skins folder of your Virtual DJ software. The default location of this folder is:

```
C:\Users\YourUserName\Documents\VirtualDJ\Skins
```

If you have installed Virtual DJ in a different location, you will need to find the skins folder there. You can also create a new folder inside the skins folder and name it as you like. For example, you can create a folder called "Pioneer" and copy the skins there.

After you have copied the skins to the folder, you can launch your Virtual DJ software and go to the settings menu. Here you can choose the skin option and select the skin that you want to use. You can also switch between different skins by clicking on the skin button on the top right corner of the software.

Step 3: Enjoy your new look

Now you are ready to enjoy your new look for your Virtual DJ software. You can explore the features and functions of the skins and customize them according to your needs. You can also mix and match different skins for different decks and create your own unique style.

Skins are a great way to enhance your experience with Virtual DJ and make it more fun and professional. With skins pioneer cdj 2000 djm 900 nexus virtual dj, you can bring the feel and quality of Pioneer equipment to your computer screen.
