How to Infect Other Players

You can sabotage tasks by pressing your sabotage button or typing `"/sabotage"` in the chat. To complete a task, you need to go to its location and interact with it according to its instructions.

How to Avoid Being Infected

To avoid being infected, you need to use your vision, hearing, or logic to spot and avoid zombies. You can use your vision to see if a player has red eyes, blood stains, or zombie-like movements. You can use your hearing to listen for zombie noises, such as growls, moans, or screams. You can use your logic to deduce if a player is acting suspiciously, such as lying, venting, or killing. If you see or hear anything that indicates a player is a zombie, you should run away from them or report them.

How to Win as a Crewmate

To win as a crewmate, you need to either complete all your tasks or vote out the traitor. You can complete all your tasks by following the steps above. You can vote out the traitor by calling an emergency meeting or reporting a dead body. You can do this by pressing the emergency button in the cafeteria or finding a corpse and pressing the report button. This will bring up a voting screen where you can discuss with other players with other players and vote for the player you think is the traitor. You can also skip the vote if you are not sure.
