How to play Video Poker Deluxe APK

If you are new to video poker or need a refresher, here are some basic rules and tips on how to play Video Poker Deluxe APK.

Basic rules of video poker

The goal of video poker is to make the best possible five-card poker hand. You start by choosing a game type and placing a bet. Then, you are dealt five cards face up.

You can choose to keep or discard any or all of the cards by tapping on them. Then, you tap on the draw button to replace the discarded cards with new ones. The final hand is then compared to the payable, and you win or lose according to the payout for your hand.

Tips and strategies for video poker

Video poker is a game of skill and luck, and there are some tips and strategies that can help you improve your chances of winning. Here are some of them:

- Learn the basic strategy for each game type. There are different optimal strategies for different video poker games, and you can find them online or in books. For example, in Jacks or Better, you should always keep a pair of jacks or higher, and never break a winning hand unless you have four cards to a royal flush.
- Practice before you play for real money. Video Poker Deluxe APK allows you to play for free with unlimited coins, so you can practice your skills and learn the rules without risking anything. You can also use the statistics feature to track your performance and see your wins and losses.
- Manage your bankroll wisely. Video poker can be addictive and fun, but you should always set a budget and stick to it. Don't chase your losses or bet more than you can afford. Also, don't play when you are tired, drunk, or distracted, as this can impair your judgment and decision-making.

Different types of video poker games

Video Poker Deluxe APK offers 16 different types of video poker games, each with its own rules and payable. Here are some of the most popular ones:

- **Jacks or Better:** This is the most basic and common type of video poker, where you need at least a pair of jacks or higher to win. The payout for a royal flush is 250 coins per coin bet, unless you bet the maximum of five coins, in which case it is 4000 coins.
- **Deuces Wild:** This is a type of video poker where all the twos (deuces) are wild cards, meaning they can substitute for any other card to make a winning hand. The payout for a natural royal flush (without any deuces) is 250 coins per coin bet, unless you bet the maximum of five coins, in which case it is 4000 coins. The payout for a four deuces hand is 200 coins per coin bet.
- **Bonus Poker:** This is a type of video poker where you get extra payouts for certain four-of-a-kind hands. For example, four aces pay 80 coins per coin bet, four twos, threes, or fours pay 40 coins per coin bet, and four fives through kings pay 25 coins per coin bet. The payout for a royal flush is the same as in Jacks or Better.
- **Double Bonus Poker:** This is a type of video poker where you get even more payouts for certain four-of-a-kind hands. For example, four aces pay 160 coins per coin bet, four twos, threes, or fours pay 80 coins per coin bet, and four fives through kings pay 50 coins per coin bet. The payout for a royal flush is the same as in Jacks or Better.
- **Joker Poker:** This is a type of video poker where there is one joker in the deck that acts as a wild card. The payout for a natural royal flush (without the joker) is 750 coins per coin bet, unless you bet the maximum of five coins, in which case it is 5000 coins. The payout for a five-of-a-kind hand (with the joker) is 200 coins per coin bet.
