# How to Use Ekahau Site Survey 5.5 for Wi-Fi Planning and Validation

Ekahau Site Survey 5.5 is a powerful tool for designing, optimizing and troubleshooting wireless networks. It allows you to perform 802.11a/b/g/n/ac/ax site surveys using a laptop or a mobile device connected to the Ekahau Sidekick 2, a dedicated Wi-Fi measurement device that provides fast and accurate data. In this article, we will show you how to use Ekahau Site Survey 5.5 for Wi-Fi planning and validation.

## Wi-Fi Planning with Ekahau Site Survey 5.5

Wi-Fi planning is the process of creating a wireless network design that meets the requirements of your environment and applications. With Ekahau Site Survey 5.5, you can plan your Wi-Fi network in four easy steps:

1. Insert and scale your floor plans.
2. Draw walls and attenuation areas to model the RF propagation.
3. Draw coverage areas to define the desired signal strength and quality.
4. Let Ekahau AI Pro automatically place and configure the access points for optimal performance.

Ekahau AI Pro is a powerful feature that uses artificial intelligence and machine learning to create the best possible Wi-Fi design for your network. It takes into account your coverage areas, capacity requirements, interference sources, channel utilization, antenna patterns, AP models and more. You can also manually adjust the AP placement and settings if you prefer.

## Wi-Fi Validation with Ekahau Site Survey 5.5

Wi-Fi validation is the process of verifying that your wireless network meets the design goals and performs as expected. With Ekahau Site Survey 5.5, you can validate your Wi-Fi network in two easy steps:

1. Perform a touch-operated site survey using your laptop or mobile device with the Ekahau Sidekick 2.
2. Analyze the survey results using various heatmaps and reports.

Ekahau Sidekick 2 is a lightweight and portable device that measures Wi-Fi signal strength, noise, interference, channel utilization and spectrum activity in both 2.4 GHz and 5 GHz bands. It also supports the new 6 GHz band for Wi-Fi 6E devices. It connects wirelessly to your laptop or mobile device via Bluetooth or Wi-Fi.

Ekahau Survey is a mobile app for iOS and Android that allows you to conduct fast and accurate site surveys with just the Sidekick 2 and your phone or tablet. It has an intuitive autopilot mode that tracks your location and captures more data at more locations. It also has an inspect mode that lets you view in-depth scan details on your survey path.

Ekahau Site Survey is a desktop application for Windows that allows you to analyze the survey data using various heatmaps and reports. You can visualize the signal strength, signal-to-noise ratio, data rate, throughput, interference, channel overlap, coverage holes, roaming issues and more. You can

also generate professional reports that document your network performance and compliance.

## Conclusion

Ekahau Site Survey 5.5 is a comprehensive solution for Wi-Fi planning and validation. It helps you create reliable and high-performing wireless networks for any environment and application. You can learn more about Ekahau Site Survey 5.5 at <http://www.ekahau.com/>.
