## How to Download Primavera P6 Professional R8.1 for Free and Legally

If you are looking for a way to download Primavera P6 Professional R8.1, a powerful project management software, for free and legally, you have come to the right place. In this article, we will show you how to get a free trial copy of Primavera P6 from the official Oracle website, and how to install it on your Windows computer.

Primavera P6 Professional is widely used by project managers, planners, schedulers, and engineers to plan, manage, and control construction projects of any size and complexity. It allows you to create detailed schedules using Gantt charts and network diagrams, track progress and costs, manage resources and risks, and generate reports and dashboards.

However, Primavera P6 Professional is not cheap. The latest version 21.12 costs \$2,750 per user license, plus annual maintenance fees. That's why many people are looking for ways to download Primavera P6 for free. But be careful: downloading Primavera P6 from unauthorized sources or using cracked versions can expose you to malware, viruses, legal issues, and poor performance.

The good news is that you can download Primavera P6 legally and safely from the Oracle Software Delivery Cloud portal. This is where Oracle offers free trial versions of its products for evaluation purposes. You can use Primavera P6 for 30 days without paying anything or violating any terms and conditions.

Ready to get started? Here are the steps to download and install Primavera P6 Professional R8.1 for free:

1. Create an Oracle account. Go to <https://edelivery.oracle.com> and sign up for a free account. You will need to provide some basic information and verify your email address.
2. Search for the Primavera P6 download package. Once you log in to the Oracle Software Delivery Cloud portal, use the search bar to look for "Primavera P6". In the results list, find the package called "DLP: Primavera P6 Professional Project Management R8.1". This is the version you want to download.
3. Add the package to your cart and check out. Click on the "Add to Cart" button next to the package name, and then click on the "Checkout" button on the top right corner of the screen. You will need to select your platform (Microsoft Windows x64) and accept the terms and

conditions before proceeding.

4. Download the zip files to your computer. On the next screen, you will see two zip files: V29766-01.zip and V29767-01.zip. These are the files that contain the Primavera P6 software and database. Right-click on each link and save them to a folder on your computer.
5. Extract the zip files and run the setup file. Go to the folder where you saved the zip files and extract them using a tool like WinZip or 7-Zip. You will get two folders: Disk1 and Disk2. Open Disk1 and double-click on the setup.exe file.
6. Choose the installation type and location. A wizard will guide you through the installation process. Choose "Typical" as the installation type and click "Next". Then choose a folder where you want to install Primavera P6 and click "Install".
7. Configure the database and connection. After the installation is complete, check the box "Run Database Configuration" and click "OK". A new wizard will open. Choose "P6 Pro Standalone (SQLite)" as the database type and click "Next". Then check "Add a new standalone database and connection" and click "Next". Enter a login name, personal name, and password for your database user (you can use "admin" for all of them) and click "Next". Finally, click "Finish" to create your database.
8. Launch Primavera P6 Professional R8.1. Congratulations! You have successfully installed Primavera P6 on your computer. To start using it, go to your Start menu and look for "Primavera P6 Professional R8.1". Enter your login name ("admin") and password ("admin") when prompted.
