How to pilot the Jackal in Battle Royale

The Jackal is a new vehicle that is exclusive to the battle royale mode. It is a helicopter that can carry up to four players and has a mounted machine gun that can deal massive damage. However,

piloting the Jackal is not as easy as it sounds, and you need to be careful of enemy fire and obstacles. Here are some tips to pilot the Jackal effectively:

- Use the left joystick to control the altitude and direction of the Jackal, and the right joystick to control the camera and aim the machine gun.
- Tap the fire button to shoot the machine gun, but be aware of its overheating and reloading time.
- Tap the boost button to increase the speed of the Jackal, but be aware of its fuel consumption and cooldown time.
- Use the map to find landing zones and supply drops, but avoid hotspots and enemy bases.
- Communicate with your teammates and coordinate your attacks and movements.

How to survive the undead horde in Undead Siege

Undead Siege is a new zombies mode that challenges you and your squad to survive for five days and nights against waves of zombies. It is a survival mode that requires strategy, teamwork, and resource management. Here are some tips to survive the undead horde in Undead Siege:

- Scavenge for resources during the day, such as ammo, weapons, scorestreaks, turrets, traps, and crafting materials.
- Build defenses around your base during the day, such as barricades, fences, mines, and sentries.
- Use weapons and scorestreaks from both multiplayer and battle royale modes, such as the Swarm, the Cluster Strike, the Death Machine, and the War Machine.
- Use operators from both multiplayer and battle royale modes, such as Price, Ghost, Adler, Tank Dempsey, Edward Richtofen, and Nikolai Belinski.
- Use perks from both multiplayer and battle royale modes, such as Quick Fix, High Alert, Hardline, Vulture, Dead Silence, and Trickster.

How to master the new weapons and maps in Multiplayer

Multiplayer is the core mode of Call of Duty Mobile, where you can compete with other players in various modes and maps. Season 6 adds two new weapons and two new maps to the multiplayer mode, which can change the way you play and strategize. Here are some tips to master the new weapons and maps in multiplayer:

- The MX9 SMG is a new functional weapon that fires fast and accurate bursts of bullets. It is ideal for close to medium range combat, especially in small maps like Stack. It has a high rate of fire, low recoil, and good mobility. However, it has a low damage output, a small magazine size, and a short effective range. To use it effectively, you should equip attachments that increase its damage, magazine capacity, and range, such as the MIP Light Barrel (Short), the Extended Mag A (+10), and the OWC Laser - Tactical.
- The KN-44 - Clout weapon blueprint is an epic weapon blueprint that gives the KN-44 assault rifle a flashy gold and purple design. It also comes with four pre-equipped attachments that enhance its performance: the RTC Steady Stock (+10% Accuracy), the Strike Foregrip (+10% Accuracy), the OWC Laser - Tactical (+10% Accuracy), and the Granulated Grip Tape (+10% Accuracy). These attachments make the KN-44 - Clout very stable and precise at long range. However, they also reduce its mobility (-40%) and control (-10%). To use it effectively, you should play defensively and use cover to your advantage.
- Favela is a medium-sized map set in the slums of Rio de Janeiro. It features multiple levels, tight corners, and a central fountain that can be used as a vantage point or a choke point. To play well on this map, you should use weapons that are versatile and adaptable to different

situations, such as assault rifles, SMGs, or shotguns. You should also use perks that increase your mobility, such as Lightweight, Skulker, or Dead Silence. You should also be aware of your surroundings and use the verticality and flanking routes to surprise your enemies.

- Stack is a small map set in a desert training facility. It is symmetrical and ideal for fast-paced gunfights. To play well on this map, you should use weapons that are powerful and reliable at close range, such as SMGs, shotguns, or pistols. You should also use perks that increase your survivability, such as Quick Fix, Toughness, or High Alert. You should also be aggressive and use the cover and corners to your advantage.
