Do you want to give your Android device a fresh look and feel? Do you wish you could change the color, icons, and widgets of your status bar? If so, you might want to try Material Status Bar APK.

Material Status Bar APK is an app that lets you customize your status bar with Material Design style. It supports all devices running Android 4.0 or higher. It offers a variety of features such as:

- Changing the color of your status bar according to predefined themes or your own preferences
- Applying different colors for different apps or notifications
- Adjusting the transparency and brightness of your status bar
- Enabling or disabling various icons such as battery, signal, wifi, etc.
- Customizing the size, position, and style of your icons
- Adding widgets such as clock, weather, calendar, etc. to your status bar
- Accessing more settings and options from the app's menu

In this article, we will show you how to download and install Material Status Bar APK on your device, and how to use it to customize your status bar. Let's get started!

## How to Change the Color of Your Status Bar

One of the most noticeable features of Material Status Bar APK is that it allows you to change the color of your status bar. You can choose from a range of predefined themes or create your own custom color scheme.

To change the color of your status bar, follow these steps:

< - Open the app and tap on the "Color" option at the top of the screen. - You will see a list of themes such as Lollipop, Marshmallow, Nougat, Oreo, etc. Tap on the one you like and see how your status bar changes accordingly. - If you want to create your own custom color scheme, tap on the "Custom" option at the bottom of the screen. - You will see a color picker where you can select any color you want. You can also adjust the hue, saturation, and value of the color using the sliders below. - Once you have chosen your color, tap on the "Apply" button at the top right corner of the screen. - You can also apply different colors for different apps or notifications by tapping on the "App List" option at the bottom of the screen. - You will see a list of apps installed on your device. Tap on the ones you want to customize and select a color for them from the color picker. - You can also adjust the transparency and brightness of your status bar by tapping on the "Transparency" and "Brightness" options at the bottom of the screen. - You can use the sliders to change the opacity and luminosity of your status bar according to your liking.

## How to Add Icons and Widgets to Your Status Bar

Another feature of Material Status Bar APK is that it allows you to add icons and widgets to your status bar. You can enable or disable various icons such as battery, signal, wifi, etc. You can also customize the size, position, and style of your icons. You can also add widgets such as clock, weather, calendar, etc. to your status bar.

To add icons and widgets to your status bar, follow these steps:

- Open the app and tap on the "Icons" option at the top of the screen. - You will see a list of icons that you can enable or disable by tapping on them. You can also drag and drop them to rearrange their order on your status bar. - To customize the size, position, and style of your icons, tap on the "Settings" icon at the top right corner of the screen. - You will see a menu where you can change the icon size, alignment, padding, font, etc. You can also choose from different icon styles such as circle, square, rounded square, etc. - To add widgets to your status bar, tap on the "Widgets" option at the top of the screen. - You will see a list of widgets that you can enable or disable by tapping on them. You can also drag and drop them to rearrange their order on your status bar. - To customize the size, position, and style of your widgets, tap on the "Settings" icon at the top right corner of the screen. - You will see a menu where you can change the widget size, alignment, padding, font, etc. You can also choose from different widget styles such as digital, analog, text, etc.
